ZAKARIA AHMAD

Full-Stack Developer — .NET, Angular & AI Integration

Bucharest, Romania | +40 732 911 110 | zackm.ahmad@outlook.com

linkedin.com/in/syzack | Portfolio: zakariaahmad.site

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 7+ years building and scaling web applications across the frontend, backend, and data layers. Deep hands-on experience with Angular, .NET (C#), and SQL/NoSQL systems on Azure and AWS. Ships production AI features and agent-based automation (Python & TypeScript) — integrating hosted and local LLMs, RAG retrieval, and human-in-the-loop workflows into working products. Consistent record of measurable performance and reliability gains in regulated, distributed, multi-country environments across banking and ESG data.

CORE SKILLS

Languages & Frameworks: C#, .NET (Core & Framework), ASP.NET Core, TypeScript, JavaScript (ES6+), Python (FastAPI), Angular (v13–v21+), RxJS, React, HTML5, CSS3/SCSS

Backend & Data: REST APIs, Entity Framework / LINQ, SQL & NoSQL, PostgreSQL, MySQL, MongoDB, SQLite, microservices, event-driven architecture, ETL pipelines, unit testing (xUnit, NUnit)

AI & LLM: OpenAI API (structured outputs, prompt engineering), RAG & embeddings (semantic retrieval), agentic workflows, human-in-the-loop design, local LLMs (Ollama), LLM observability (Phoenix tracing), AI-assisted development (Claude Code, Cursor, GitHub Copilot)

Cloud & DevOps: AWS (EKS, Kubernetes, SQS, PostgreSQL), Azure (AZ-900 certified), Docker, CI/CD (GitHub Actions)

Security & Practice: JWT & OAuth, system design & architecture, domain-driven design (DDD), hexagonal architecture, Agile/Scrum, cross-team collaboration, mentoring

PROFESSIONAL EXPERIENCE

Morningstar Sustainalytics — Bucharest, Romania

Backend-Focused Full-Stack Developer (Contract) — *Nov 2025 – Jun 2026*

- Built and maintained .NET/C# backend orchestration flows for Canvas, a centralized ESG platform powering regulated Risk, Compliance, and Climate products, where jobs are the unit of execution, failure, and recovery.
- Implemented asynchronous, event-driven processing (AWS SQS, batch jobs, ETL) and led part of a Pentaho → C# migration that cut production bugs and debugging time by ~50%.
- Designed micro-job and partial-job execution models to shrink failure blast radius and scale processing of large, evolving ESG datasets.
- Ensured backward compatibility of shared contracts across ESG Risk Ratings, EU Taxonomy, and Climate solutions, minimizing cross-product impact.
- Contributed to AWS architecture (EKS, PostgreSQL, async processing) for fault-isolated, regulatory-compliant systems.

Deutsche Bank — Bucharest, Romania

Senior Frontend (Angular) Developer — *Sep 2022 – Jun 2025*

Senior frontend developer in a small, Agile team owning two business-critical release-management applications, working alongside a lead developer and two other engineers.

- Led the end-to-end migration of two core release-management applications from legacy HTML/JavaScript to Angular v13 (TypeScript, RxJS), improving responsiveness by ~45% (performance benchmarks) and user experience (post-deployment UX surveys).
- Mentored and guided 4 junior developers through a backend API migration, supporting their technical growth and ensuring on-time, quality delivery.
- Improved software maintainability by reducing codebase size by nearly 50%, leading to faster development cycles and enhanced long-term code quality.
- Set the team's design guidelines, drove technology choices, and enforced coding standards

Mindgeek — Bucharest, Romania

Full-Stack Software Developer — *Jul 2020 – Jul 2022*

- Delivered fraud and reporting web products across the full development cycle for distributed teams spanning Romania, Canada, USA, Cyprus, and France.

- Integrated external APIs via Azure Logic Apps and Azure Functions, automating workflows that reduced chargebacks and fraud cases by ~15%.
- Produced requirements documentation, flowcharts, and UI layouts ahead of implementation; collaborated across frontend, backend, DBA, and QA within Scrum.

Simpology (Australia) Bucharest, Romania
Junior Full-Stack .NET Developer *Jun 2018 – Jan 2020*

- Built APIs and web applications on MySQL and MongoDB (increasing application speed by ~30%), delivering plugins, widgets, and high-quality UI components while reporting sprint progress and blockers in weekly reviews.

PERSONAL PROJECTS

Job Tracker Agent · Python · FastAPI · Ollama *Jun 2026 – Jul 2026*
Local, privacy-first job-search agent: ingests Outlook mail via Microsoft Graph, extracts structured data with a local Ollama LLM into SQLite, and reconciles LinkedIn CSVs, notes, and duplicates. Includes RAG over interview notes and synced emails (embeddings + cosine-similarity retrieval). Built with domain-driven design / hexagonal architecture, a Typer CLI, a FastAPI service, and a Streamlit dashboard. Private repository — code walkthrough and live demo available on request.

YNAB Automation Agent · TypeScript / Node.js *Jun 2025 – Jan 2026*
Fully hands-off pipeline from bank statement to categorized YNAB budget. An AI agent resolves unknown merchants via company-registry lookup and LLM reasoning, with human-in-the-loop email approval (Vercel). Playwright pipelines sync two banks, applying 200+ payee rules with auto-flagging. Private repository — code walkthrough and demo available on request.

Firehouse Restaurant Website · Angular SSR *Nov 2025 – Feb 2026*
firehousebucharest.com
Production website for a Bucharest burger restaurant: menu browser, table reservations, photo gallery, and reviews. Includes AI-powered natural-language menu search — users describe what they feel like eating and OpenAI suggests matching dishes.

BestJobs Filter · Browser Extension *May 2026 – Jun 2026*
chromewebstore.google.com/detail/bestjobs-filter
Extension for bestjobs.eu that hides unwanted listings by keyword, company, or manually. All filtering runs locally; no data leaves the device.

EDUCATION

M.Sc. Computer Science — Romano-Americana University, Bucharest *2021 – 2023*
B.Sc. Computer Science — Romano-Americana University, Bucharest *2018 – 2021*

CERTIFICATIONS & TRAINING

- **Software Architecture** — Skillab, 2026**:** Covering architectural patterns, DDD, microservices, service communication, data stores, AWS, Docker, CI/CD, quality-attribute tactics, security, and architecture evaluation (ATAM).
- **Microsoft Certified: Azure Fundamentals (AZ-900)** — Pearson VUE, 2022
- **UX/UI Design** — IT School, 2025 (design thinking, wireframing, prototyping, design systems, accessibility; Figma & Miro)
