

ZAKARIA AHMAD

Full Stack Developer (.NET, Angular, Cloud Systems)

0732911110 • zackm.ahmad@outlook.com • linkedin.com/in/syzack • Bucharest, Romania

I build scalable and reliable systems across frontend, backend, and data workflows, with a strong focus on maintainability and performance.

Full Stack Software Developer with 7+ years of experience building scalable web applications across frontend, backend, and data layers. Experienced in Angular, .NET (C#), and SQL/NoSQL systems, with exposure to cloud platforms (Azure, AWS), modern deployment practices, and AI-assisted developer workflows including GitHub Copilot. Worked across the full development lifecycle, from UI development to backend orchestration and data workflows, including asynchronous processing and ETL pipelines in enterprise, cross-functional environments with multiple stakeholders. Currently expanding into applied AI topics including LLM fine-tuning methods, RAG, and multi-agent systems through structured learning.

Key Achievements

Boosted App Performance Optimized application responsiveness by 45% leading to refined user satisfaction.	Enhanced Development Efficiency Developed an internal AI-assisted knowledge base, improving context accessibility and increasing effectiveness of tools like GitHub Copilot by ~30%	Strengthened Data Platform Reliability Contributed to stable, re-runnable job-based workflows, improving consistency and trust in ESG data outputs across multiple products.
Streamlined Development Process Reduced codebase size by 50%, expediting development cycles.	Reduced debugging time and production defects Migrated ETL workflows from legacy Pentaho to modern C# pipelines, resulting in ~50% fewer bugs and faster debugging cycles	

Skills

Key Skills::

Frontend Web Development (Angular) · UI/UX Collaboration · Software Development (Full Stack) · Cloud Computing (Azure) · Object-Oriented Programming (OOP) · Agile/Scrum Methodologies · Cross-Team Collaboration · Strategic Problem-Solving · Leadership & Mentoring · Continuous Improvement

IT Skills:

Angular (v21+) with RxJS · TypeScript / JavaScript (ES6+) · HTML5 / CSS3 / SCSS · Responsive Design & State Management · C# /.Net (Core & Framework) · ASP.NET Core & REST APIs · Entity Framework / LINQ · SQL / No SQL Databases · Docker (exposure & containerization) · Kubernetes (familiarity) · Azure Cloud Services (AZ-900 Certified) · DevOps (CI/CD Pipelines) · Git / GitHub / GitLab · Security (JWT & API Security & Auth) · AI-assisted developer workflows (GitHub Copilot) · Enterprise multi-stakeholder communication · LLM fine-tuning methods (studied) · RAG & multi-agent systems (studied)

Experience

Morningstar Sustainability

Bucharest, Romania

Backend-Focused Full Stack Developer (Contractor)

11/2025 - 06/2026

Contributed to **Canvas**, a centralized ESG orchestration platform powering regulated Risk, Compliance, and Climate products, where jobs are the unit of execution, failure, and recovery

- Developed and maintained backend orchestration flows (.NET/C#) aligned with the canonical publication pipeline (compute → validate → publish → job finalization → audit outputs).
- Implemented asynchronous, event-driven processing (SQS, batch jobs, ETL pipelines) and contributed to **Pentaho** → **C# migration**, reducing debugging time and production bugs by nearly 50%.
- Worked with partial jobs and micro-job execution models to reduce blast radius and enable scalable processing of large, evolving ESG datasets.
- Ensured backward compatibility of shared contracts and outputs, minimizing cross-product impact across ESG Risk Ratings, EU Taxonomy, and Climate solutions.
- Contributed to AWS architecture (EKS, PostgreSQL, async processing) for scalable, fault-isolated, regulatory-compliant systems.

Deutsche Bank

Bucharest, Romania

Senior Frontend (Angular) Developer

09/2022 - 06/2025

Part of a small, Agile-driven team at Deutsche Bank, collaborating closely with a lead developer and two other software developers, we significantly improved two vital applications that handle release management.

- Led end-to-end migration of two core applications from legacy HTML/JavaScript to Typescript Angular v13, resulting in a 45% improvement in responsiveness (measured via performance benchmarks) and enhanced user experience (based on post-deployment UX user surveys).
- Mentored and guided 4 junior developers during backend API migration, strengthening leadership skills and ensuring successful project delivery.
- Improved software maintainability by reducing codebase size by nearly 50%, leading to faster development cycles and enhanced long-term code quality.
- Adopted decision-making responsibility by setting up design guidelines, choosing the right technologies for our needs, and ensuring everyone followed the coding standards for consistent, quality output.

Mindgeek

Bucharest, Romania

Full Stack Software Developer

07/2020 - 07/2022

Working on all development cycles of multiple web-based products, focused on Fraud and Reporting applications.

- Integrated external APIs with Azure Logic Apps and Azure Functions, automating workflows that reduced chargebacks and fraud cases by ~15%.
- Participated in Scrum ceremonies (daily stand-ups, sprint planning, reviews) to ensure alignment and transparency across distributed teams.
- Developed flowcharts, UI layouts, and documentation to identify project requirements before jumping into designing and implementing solutions.
- Delivered effective features to clients in a work-from-home environment by communicating with various teams from different countries including Romania, Canada, USA, Cyprus, France.
- Collaborated and met team deadlines with other team members and team leads including frontend, backend, DBA, and QA.

Simpology Australia

Bucharest, Romania

Junior Full Stack.Net Developer

06/2018 - 01/2020

Increased application speed by 30% by building APIs and web apps utilizing MySQL and Mongo databases.

- Optimized development efficiency by applying best practices in technology usage, leading to the successful completion of tasks involving plugins, widgets, and high-quality HTML page development.
- Reported sprint progress and blockers during weekly reviews, supporting smoother sprint delivery and better alignment between junior and senior developers.
- Participated actively in junior developers' challenges such as: completing several tasks or projects at home before a stabilized deadline.

Education

Romano-Americana University

Bucharest, Romania

Master's Degree in Computer Science

10/2021 - 07/2023

Romano-Americana University

Bucharest, Romania

Bachelor's Degree in Computer Science

10/2018 - 06/2021

Training / Courses

- AI Agent Development

— Skillab | 2026 | Focused on AI agent development, with learning goals around LLM fine-tuning methods, RAG, and multi-agent systems.
- UI/UX Design

— IT School | 2025 | Completed UX/UI Design course focused on user-centered design, design thinking, user research, wireframing, prototyping, design systems, responsive design, accessibility using Figma & Miro.
- Microsoft Certified: Azure Fundamentals AZ-900 | Certification Number: 1210-9259

— Pearson VUE | 2022
- Oracle Java SE Programmer Certificate, Computer Programming / Programmer

— Link Academy | 2018
